Professional Summary

• Full-stack software engineer with 3+ years of experience building robust, scalable applications. Expertise in tackling complex data challenges using React, .NET, Python, and Docker to develop critical systems for educational platforms, government institutions, and technology companies. Backed by a Computer Science degree from UFRJ and C2 professional English proficiency.

Skills

- JavaScript | TypeScript | React | C# | .NET | Python | Django | Node | Express | Redux | NextJS | PostgreSQL | SQL Server | MongoDB | Git
- Frontend | Backend | Full-Stack | SQL | NoSQL | Docker | Scrum | Agile | English and Portuguese – *Professional proficiency or above*

Experience

Software Engineer **BigDataCorp** *Rio de Janeiro, Brazil* **06/2024 – current**

Jr. Software Engineer | 01/2026 – current

- Orchestrate the end-to-end development of core billing and monetization platforms (React/.NET), managing complex data flows for contracts, invoices, and accounts receivable to generate consolidated financial reports for leadership and operations. .
- Establish Test-Driven Development (TDD) practices and technical documentation protocols, bridging requirements gathering with high-quality implementation
- Guide the technical growth and onboarding of interns, enforcing internal coding standards and architectural patterns under senior supervision.

Software Engineer Intern | 06/2024 – 12/2025

- Develops key features for internal administrative panels, building .NET APIs and responsive React components to enable critical data management and streamline workflows for internal users.
- Enhances the reliability of internal systems by creating new monitoring tools and shipping targeted back-end and front-end improvements to support daily administrative operations associated with the foundation of the company, Latin America's largest data technology company.
- Contributes to a major platform modernization effort by refactoring legacy code and migrating essential UI components to a more maintainable and efficient architecture

Scientific Research Fellow - ETL **COPPETEC** *Rio de Janeiro, Brazil* **06/2023 - 12/2025**

- Contributed to a large-scale ETL pipeline of 40+ Talend jobs, personally designing new jobs to process and integrate critical data.
- Managed high-impact **database** operations, using **PostgreSQL** and **SQL Server**, including insertions and corrections in production environments of a major public institution, ensuring data integrity and operational reliability.
- Led the development of solutions for workspace sharing, creating a method to host the **Talend** application in **Docker containers**..

Scientific Research Fellow - Development **Machine Teaching** *Rio de Janeiro, Brazil* **02/2022 - 12/2025**

- Led the development of a synchronous assessment module for a capstone thesis project, unifying the platform's evaluation cycle within a secure, time-controlled exam environment.
- Optimized user data dashboards by rewriting database queries, reducing load times by over 70%.
- Automated backend and UI testing suites using Playwright and Django.testing, establishing a strong foundation for platform reliability.

Education

Bachelor of Science **Universidade Federal do Rio de Janeiro** *Rio de Janeiro, Brazil* **02/2021 - 11/2025**

- Major in Computer Science (Top-ranked university in Brazil, recognized for excellence in Science and Engineering fields)

Projects

- **vinyl-scrubber**: A full-stack ecosystem bridging physical vinyl playback with digital tracking, built with a .NET 9 backend (Last.fm/Spotify OAuth, Alexa webhooks) and a React 19 real-time dashboard.
- **zye.bio**: A full-stack 'link-in-bio' creator with customizable layouts, built with React, C#, .NET, and PostgreSQL.
- **spotify-multiverse**: A music discovery app that generates personalized recommendations by applying math to playlist attributes.

Freelancer

- **Instituto de Proteção ao Jogador**: Developed the complete system for a psychological project aimed at helping individuals with gambling addiction, in partnership with Brazilian betting companies.
- **Bracell — Floresta Sempre Viva**: Developed an interactive website for an environmental project, in association with a major company.
